Career Objective

BSc Computer Science and Information Technology graduate and Computer Science graduate from the University of KwaZulu-Natal. Motivated, analytical and self-driven aspiring software developer with strong fundamentals in programming, algorithms, and modern development tools. Eager to contribute to real-world software solutions while continuing to grow in a professional development environment.

Education

BSc Honours (Computer Science), University of Kwa-Zulu Natal, Pietermaritzburg, South Africa
Mar 2025 – Dec 2025 (completed)

BSc Computer Science and Information Technology, University of KwaZulu-Natal, Pietermaritzburg, South Africa
Start date: Mar 2022 – Graduation date: 15 May 2025

National Senior Certificate, Raisethorpe Secondary School, Pietermaritzburg, South Africa
2016 - 2020
Achieved 4 distinctions with an A Aggregate pass

Technical Skills

Programming Languages: HTML, CSS, Python, Java, C++, SQL, C#

Frameworks and Tools: Wing, Notepad++, JGrasp, Eclipse, Clion, SQLSMS19, Visual Studio, Google Colab, IntelliJ IDEA, ASP.NET, PowerBI, Scikit-Learn, Pandas, NumPy

Core Competencies: OOP, Web Development, Data Structures and Algorithms, Database Management, Problem Solving, Team Collaboration, Debugging, AI, ML Basics

Experience

Programming Demonstrator (Part-time), University of KwaZulu-Natal, Pietermaritzburg, South Africa
Feb 2024- Oct 2024 | Aug 2025- Oct 2025
Tutored first-year and second year students in mastering Python, Java and Data Structures during practical lab sessions. Guided students through debugging, code design and algorithm implementation; prepared and ran hands-on lab exercises.

Key Projects

Point of Sales system for Townbush Pharmacy (Third year group project- 2024)
Built a secure full-stack web application with authentication, shopping cart, and payment workflow. Designed optimized SQL database for inventory and transactions.

Simple Biology Quiz and Word Search Game (Third year group project- 2024)
Led development of an interactive quiz + word-search game with difficulty levels, timers, and random question generation. Built modular, scalable C++ logic.

A Model for Network Traffic Classification of 5G Networks for QoS Improvement (Research Paper & Honours Research- 2025)
Developed a supervised ML model using flow-level features to enhance QoS in 5G networks.
Research paper to appear in The Indonesian Journal of Computer Science.
Delivered academic presentations within the School of Mathematics, Statistics & Computer Science
