

MOHAMMED AQEEL ISMAIL

Pietermaritzburg, South Africa | Cell no.: 081 711 5093

| aqeelismail06@gmail.com | www.linkedin.com/in/aqeel06 | GitHub: <https://github.com/tomRiddle-the1st> | Portfolio: tomriddle-the1st.github.io

Professional Summary:

Aspiring Software Developer with strong foundations in Python, Java, C++, and SQL, supported by a BSc Computer Science and IT and BSc Honours in Computer Science. Experienced in developing full-stack applications, backend systems, and machine learning models through academic and practical projects. Demonstrates strong problem-solving ability, clean coding practices, and a solid understanding of data structures, algorithms, and object-oriented design. Seeking to contribute to scalable, real-world software solutions in a professional development environment.

Education:

BSc Honours (Computer Science), University of KwaZulu-Natal, Pietermaritzburg, South Africa

Mar 2025 – Dec 2025 (completed)

BSc Computer Science and Information Technology, University of KwaZulu-Natal, Pietermaritzburg, South Africa

Start date: Mar 2022 – Graduation date: 15 May 2025

National Senior Certificate, Raisethorpe Secondary School, Pietermaritzburg, South Africa

2016 – 2020

Achieved 4 distinctions with an A Aggregate pass

Technical Skills:

Programming Languages: HTML, CSS, Python, Java, C++, SQL, C#

Frameworks and Tools: Wing, Notepad++, JGrasp, Eclipse, Clion, SQLSMS19, Visual Studio, Google Colab, IntelliJ IDEA, ASP.NET, PowerBI, Scikit-Learn, Pandas, NumPy

Core Competencies: OOP, Web Development, Data Structures and Algorithms, Database Management, Problem Solving, Team Collaboration, Debugging, AI, ML Basics

Experience:

Programming Demonstrator (Part-time), University of KwaZulu-Natal, Pietermaritzburg, South Africa

Feb 2024- Oct 2024 | Aug 2025- Oct 2025

Tutored first-year and second year students in mastering Python, Java and Data Structures during practical lab sessions. Guided students through debugging, code design and algorithm implementation. Delivered structured lab sessions improving programming comprehension and performance. Provided individual academic support to strengthen foundational coding skills.

Key Projects:

Point of Sales system for Townbush Pharmacy (Third year group project- 2024)

Tech: C#, ASP.NET, SQL Server

- Developed a secure full-stack POS system with authentication, cart functionality, and transaction processing.
- Designed and implemented a normalized SQL database for inventory and sales management.
- Optimised database queries to improve system performance and efficiency.

Simple Biology Quiz and Word Search Game (Third year group project- 2024)

Tech: C++

- Led development of an interactive educational game with difficulty levels and timers.
- Implemented modular and scalable logic for quiz generation and gameplay mechanics.

Network Traffic Classification of 5G Networks for QoS Improvement (Honours Research- 2025)

- Developed a supervised machine learning model to classify network traffic using flow-based features.
- Improved Quality of Service (QoS) decision-making through accurate traffic classification.
- Conducted data preprocessing, feature extraction, and model evaluation.
- Delivered academic presentations within the School

Achievements:

- Research paper accepted for publication in the Indonesian Journal of Computer Science.
- Successfully mentored and supported over 100+ students in programming modules.
- Developed multiple real-world academic software systems and ML models.

Strengths:

Problem-solving ability
Basic programming fundamentals
Willingness to learn & adapt
Communication and teamwork
